- Built-in Digital Whiteboarding App
- Supports BYOD
- Surface Independent
- Wireless Touchback

Go PRO & Power Your Projector

WORLD'S FIRST INTERACTIVE WIRELESS DIGITAL WHITEBOARD DEVICE FOR PROJECTORS, POWERFUL ENOUGH TO BE A PRO

EyeRIS Pro is an advanced surface-independent wireless touch interactive teaching device. It can convert any flat surface such as a wall or dry-erase whiteboard into Touch enabled Digital Whiteboard. With a superior smartphone-like gesture-touch experience, it supports interactivity up to 10 simultaneous touch points.

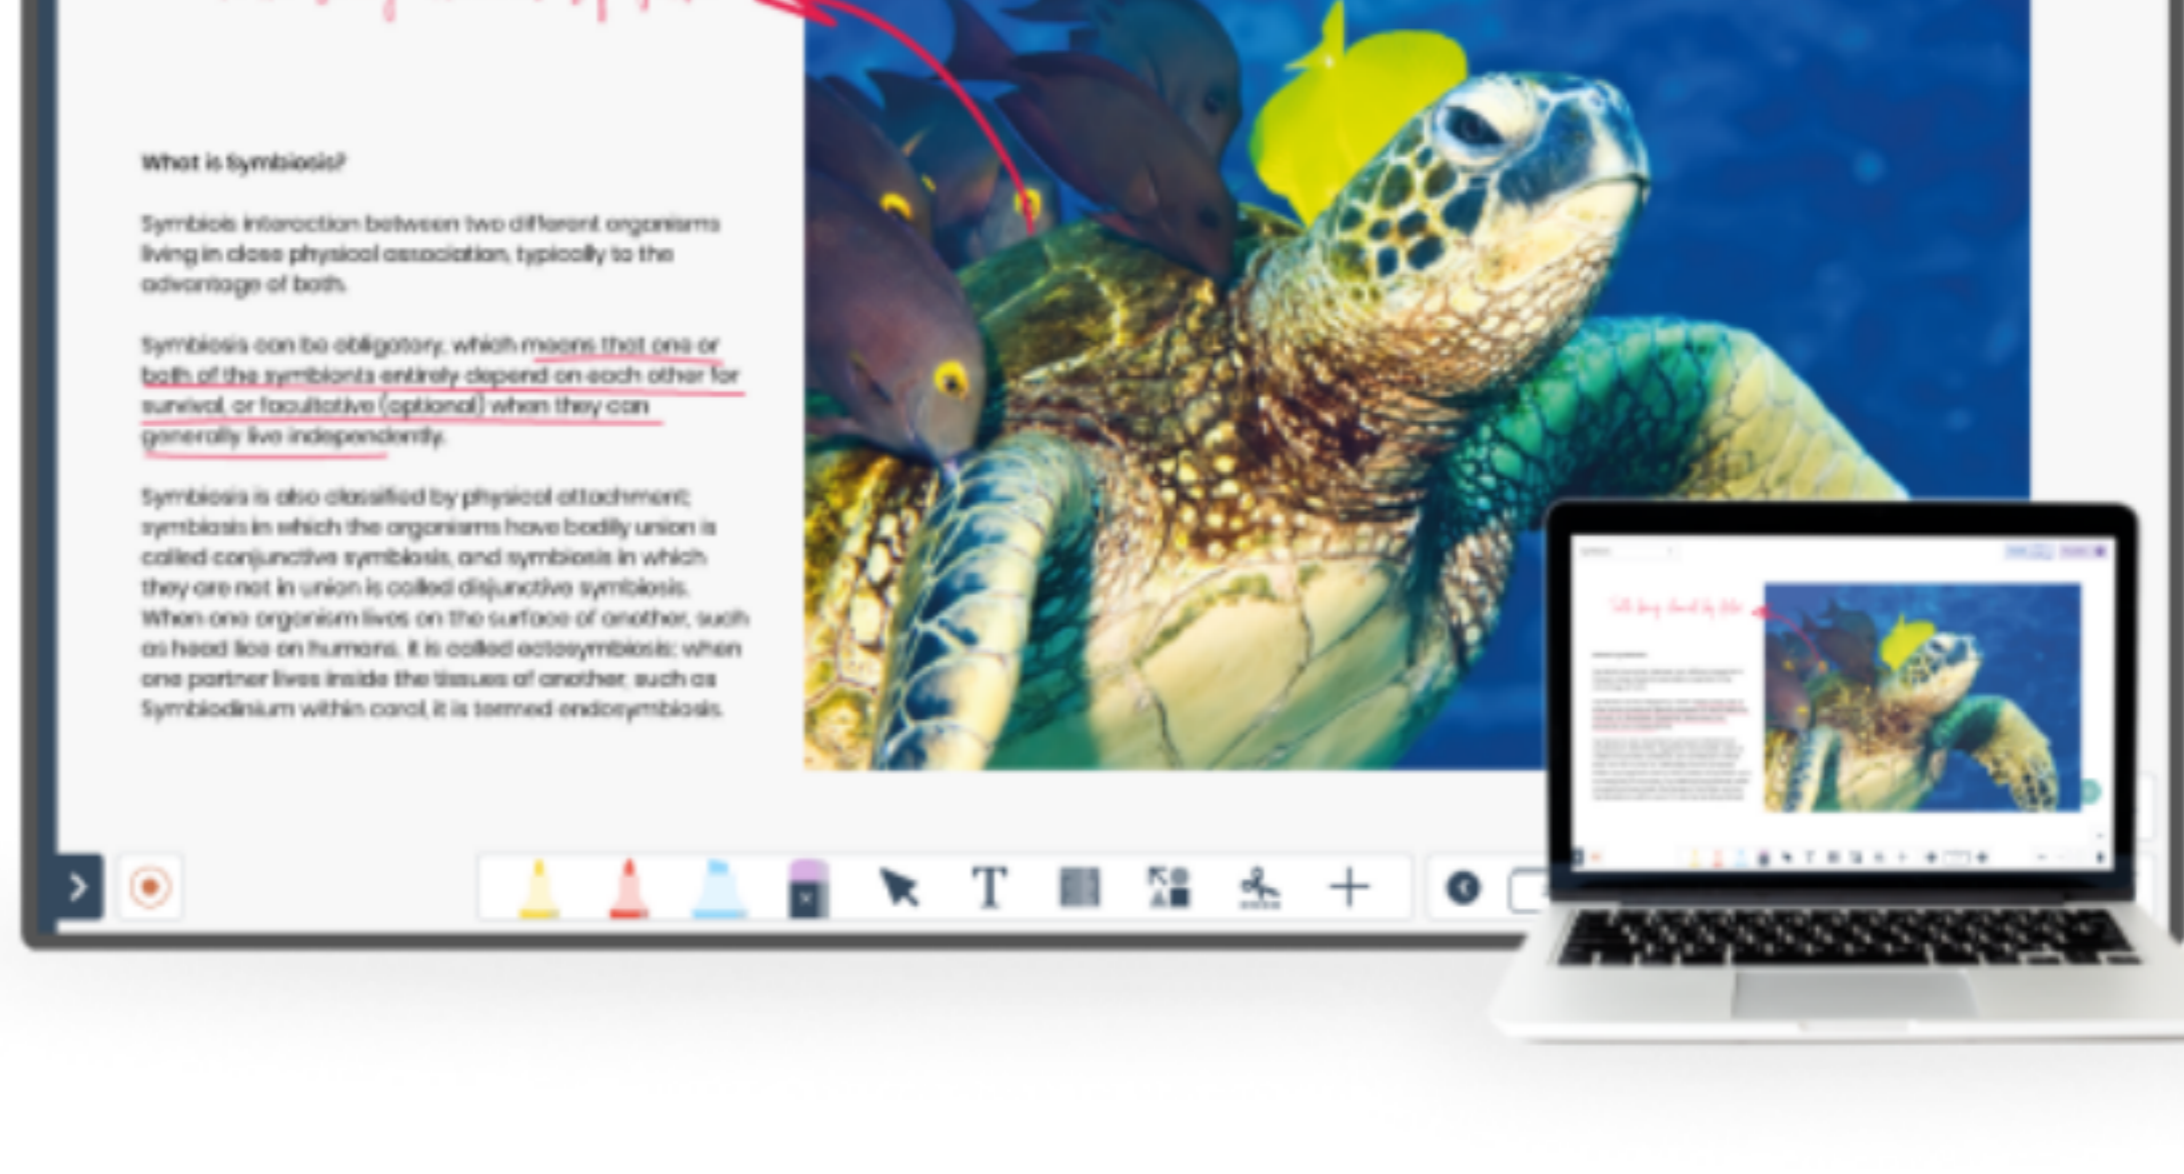

Core Capabilities

PixelTouch Interactivity

EyeRIS® Interactive Sensing Camera converts any flat projection Surface into a touch-enabled digital whiteboard. The high precision and lag-free writing enable a great user experience.

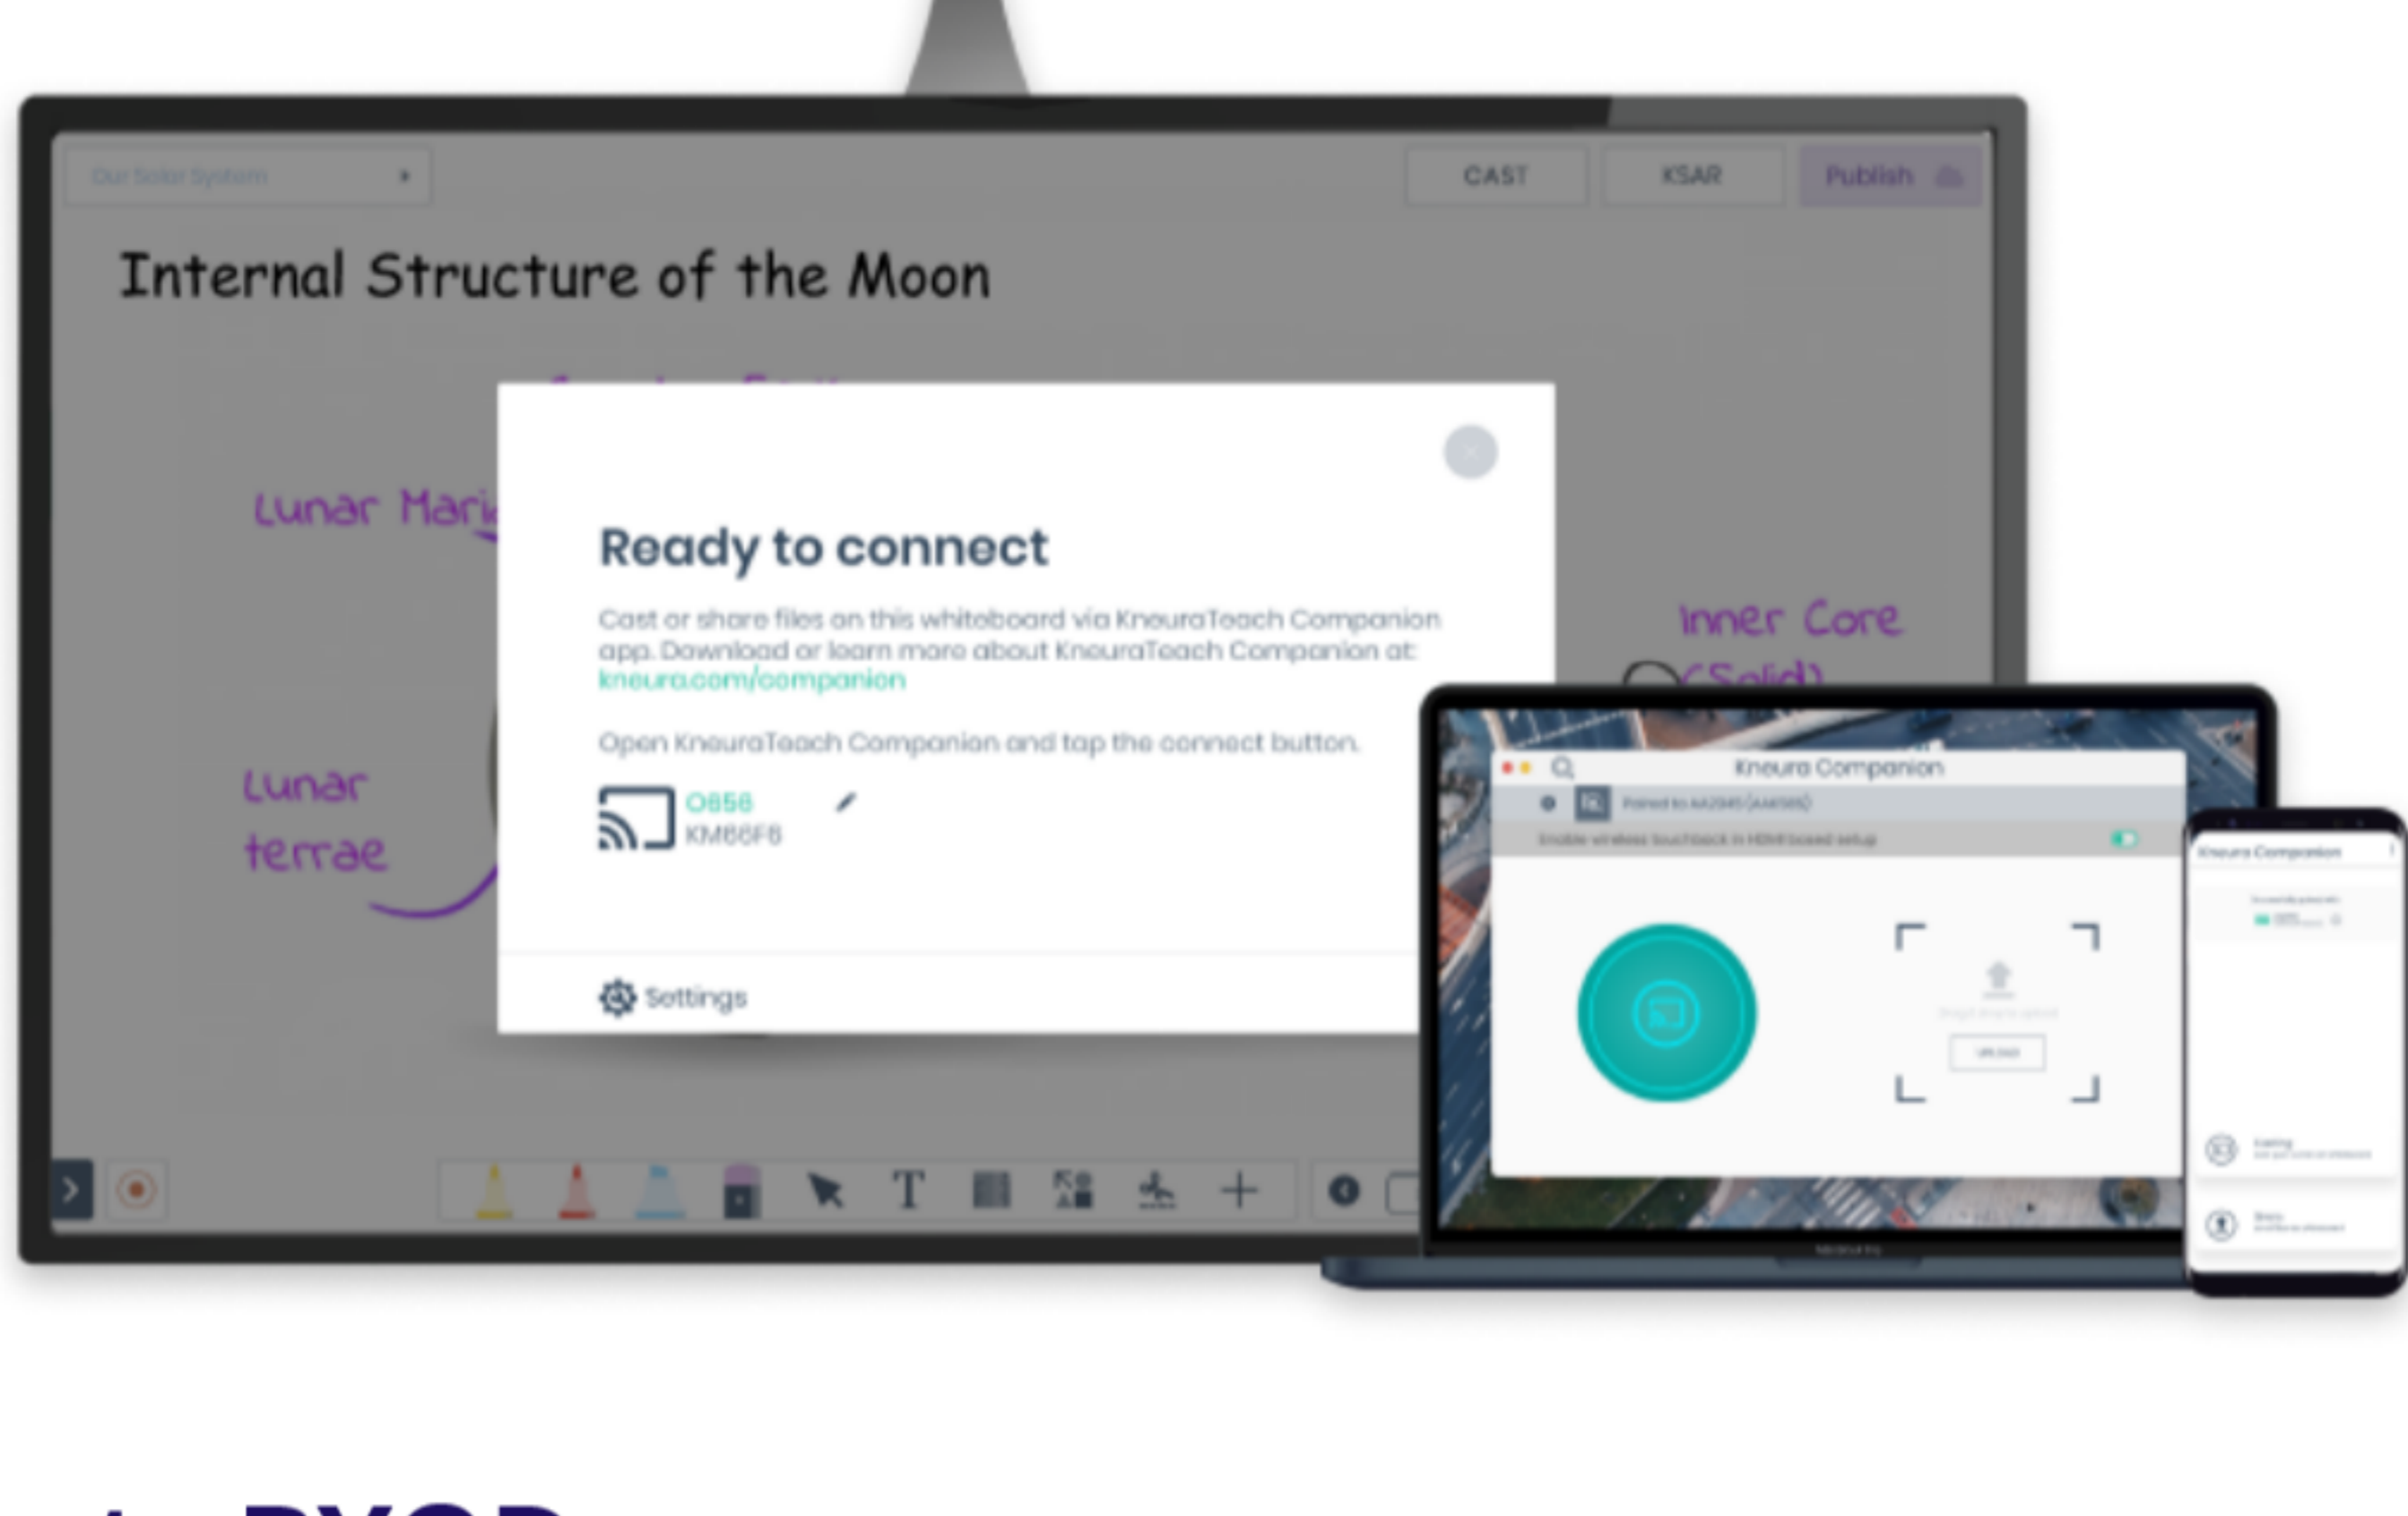

WiFi Touch

World's first wireless interactive projection device. Leverage touch capabilities on your powerful Windows® or MAC® from the big screen without connecting any USB cable or wires.

CloudShare

With a click of a single button, your entire Digital Whiteboard writing and content can be exported and shared with the audience via a simple QR code reducing the time and effort involved in taking handwritten notes in a classroom.

Supports BYOD

Any of your personal devices like mobile phones, tablets or laptops can be shared instantly on the display via companion app without the hassle of connecting any cables.

How Does EyeRIS Pro Work?

The image sensors in EyeRIS Pro intelligently track and learn the environment, enabling seamless information control with any display. It's the first device to use machine learning for human-computer interaction for surface computing. Using advanced deep learning algorithms, EyeRIS Pro can distinguish between ambient noise and Human Input more efficiently than any other computer interface in the world.

SIMPLE TO INSTALL

Just plug-in the device to your projector or install it up on top of your whiteboard and you are ready to use it in under 10 mins.

BUILT-IN QUAD-CORE ARM COMPUTER

Spend no time in connecting laptops or PC, this ALWAYS ON whiteboard is always enabling the users to write, share and print instantly.

HIGH-PRECISION

Designed for low latency and Pixel Touch Interactivity with Integrated Learning Management System. The superior optical undistorted algorithms track every input with pixel precision.

Interactive Whiteboard Teaching Suite

Kneura Teach

Bundled with Interactive Whiteboard Teaching suite Kneura Teach, having a gamut of tools and features that assists educators to deliver effective lessons in the classroom.

Smart Tools

Handwriting recognition to solving mathematical equations, adding more pages to changing backgrounds, smart draw, and highlighter.

My Cloud

Get access to the most updated and accurate information in the form of texts, images and videos directly on the whiteboard through My Cloud & KSAR.
